

COUSINS PACKAGING HAS THE SOLUTION!

Our standard line of pallet wrappers is designed to satisfy most applications but if needed, we can provide a time-tested and dependable option for any of your specific and/or unusual wrapping requirements. The standard machines can be equipped with options to handle larger, taller, heavier, and unusual, shaped loads. They can be designed to be used with standard or special material handling equipment. **We offer solutions that meet a variety of environmental conditions, including dusty, wet, cold, and freezer environments.**

Semi-Automatic Turntable Models:

Semi-Automatic Rotary Arm Models

Fully Automatic Turntable Models:

Fully Automatic Rotary Arm Models

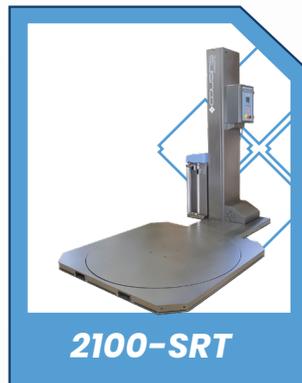

This line-up of pallet wrappers will make your buying decision easy.
Choose between a semi-automatic or full automation!

**AFFORDABLE
VALUE**

VALUE PLUS

**OUR MOST ROBUST
SEMI-AUTOMATIC**

FULL AUTOMATION

- ❖ **THE PILOT:** This model has more standard features than any other pallet wrapper in its price range. Perfect for low volume, standard applications
- ❖ **2100-SRT:** Loaded with standard features and available options that can satisfy most environmental and production requirements.
- ❖ **THE SWITCH:** Our most robust semi-automatic.
- ❖ **THE A-ARM:** Operate the machine from the forklift with a wireless remote. No more getting on and off the forklift to attach and cut the film.

ALL OUR MODELS HAVE THE FOLLOWING STANDARD FEATURES

- ❖ **Superior safety designs:** Carriage anti-fall device, carriage descent obstruction sensing, carriage door electrical interlock and more
- ❖ **All AC variable speed motors**
- ❖ **Forklift lifting tubes** front & rear for easy portability
